

HIMANSHU KUMBHAJ

Full Stack Web Developer | Python Backend Developer

☎ 91+ 8871571003 ✉ himanshukumbhaj0@gmail.com 🌐 Website 🔗 LinkedIn 🐙 GitHub 📍 Bhilai, India

EDUCATIONS

Shri Shankaracharya Technical Campus Bhilai | Bhilai (C.G)

Oct 2022 - May 2026

B.Tech - Computer Science

CGPA : 7.2

- Python and Django Full Stack Web Development

PROJECTS

To-Do List Web App | 🌐 Website 🐙 Github

Individual Project

- Developed a **secure multi-user task management application** using **Django, CBVs, and SQLite**, featuring **100% user-isolated authentication and authorization**.
- Executed **full CRUD operations** with Django authentication and **object-level access control**, enabling users to manage only their own tasks securely.
- Integrated **7+ productivity features**, such as search, filtering, sorting, pagination, due dates, priorities, and categories for enhanced task management.
- Designed a **fully responsive interface** utilizing **Django Template Language (DTL)**, reusable templates, and custom CSS, reducing code duplication and enhancing maintainability.

Technologies / Tools Used : Python, Django, SQLite, HTML, CSS

Social Media Web Application | 🌐 Website 🐙 Github

Individual Project

- Developed a **full-stack social networking platform** using Python, Django, SQLite, HTML, CSS, and JavaScript, supporting over **15 active test users** with secure authentication.
- Implemented **authentication, authorization, and role-based access control (RBAC)** to safeguard user accounts, posts, and group interactions.
- Engineered **scalable database models** utilizing **Django ORM, CBVs, and CRUD operations**, improving data retrieval time from **2 seconds to under 400 milliseconds**.
- Designed a **responsive UI** with **HTML5, CSS3, Bootstrap, and JavaScript**, facilitating seamless post creation, user interactions, and group management.

Technologies / Tools Used : Django, SQLite, HTML, CSS, JavaScript

Integrated Web Reconnaissance and Exploitation Engine | 🌐 Website 🐙 Github

Lead Developer

- Engineered a **Flask-based web automation platform** for **reconnaissance, vulnerability assessment**, and executing Python scripts, featuring **automated PDF report generation**.
- Automated **dynamic PDF report generation**, reducing report creation time from **20 minutes to under 5 seconds** for each assessment.
- Architected a **modular Python backend** that integrates **4 security analysis workflows**, streamlining automation, report generation, and facilitating future feature expansions.
- Designed a **scalable backend architecture** with reusable modules, minimizing code duplication and enabling swift integration of new security tools and workflows.

Technologies / Tools Used : Flask, Python, PDF, Bash, Kali Linux Tools

SKILLS

Programming Languages : Python, JavaScript, SQL, C, C++

Frameworks & Libraries : Django, Flask, FASTAPI, DJANGO REST Framework

Databases : SQLite, MySQL, PostgreSQL

Tools & Platforms : REST APIs, Authentication, Authorization, JWT, CRUD Operations, ORM, HTML, CSS, Bootstrap, jQuery, SQLite, MySQL, PostgreSQL, Git/Github, Automation & Scripting, Linux, AWS EC2, Postman, Scapy, GitHub, Git

Soft Skills : DSA, Problem Solving, Technical Documentation, Version Control, Project Management, Leadership, Communication, Teamwork, Time Management

Languages : English, Hindi
