PROJECT EXPERIENCE

Django To-Do List Web Application (Python, Django, SQLite, HTML, CSS) | [GitHub ↗](#) [ViewSite ↗](#)

- Developed a secure multi-user task management application using Django and Class-Based Views.
- Implemented CRUD operations with authentication, user-specific task management, and object-level authorization.
- Integrated advanced features including search, filtering, sorting, pagination, due dates, priorities, and category management.
- Designed a responsive interface using reusable templates, Django Template Language (DTL), and custom CSS.

Social Media Web Application (Django, SQLite, HTML/CSS/JS) | [GitHub ↗](#) [ViewSite ↗](#)

- Developed a full-stack social networking platform using Python, Django, SQLite, HTML, CSS, JavaScript, implementing secure authentication, authorization, role-based access control (RBAC), session management, and user profile features for 15+ active test users.
- Engineered scalable relational database models using Django ORM, class-based views, CRUD operations, and database optimization techniques, reducing data retrieval time from 2 seconds to under 400 milliseconds while improving application performance and maintainability.
- Designed a responsive and user-friendly interface utilizing HTML5, CSS3, Bootstrap, JavaScript, DOM manipulation, and dynamic content rendering to support seamless post interactions, group management, and enhanced user engagement.

Integrated Web Reconnaissance and Exploitation Engine (Flask, Python, PDF) | [GitHub ↗](#) [ViewSite ↗](#)

- Engineered a Flask-based web automation and cybersecurity platform to execute reconnaissance, vulnerability assessment, and custom Python scripts while dynamically generating PDF reports, reducing manual report generation time from 20 minutes to under 5 seconds per report.
- Architected a modular backend system using Python, enabling integration of 4 distinct security analysis workflows, automated data processing, report generation, and scalable feature expansion with minimal code changes.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C, C++

Framework: Django, Flask, FASTAPI, DJANGO REST Framework, NumPy, Pandas, Scikit-Learn

Backend Development: REST APIs, Authentication, Authorization, JWT, CRUD Operations, ORM, API Integration

Web Technologies: HTML, CSS, Bootstrap, jQuery

Database & Tools: SQLite, MySQL, PostgreSQL, Git/Github, Automation & Scripting, Linux, AWS EC2, Postman, Scapy

Cybersecurity: OWASP Top 10, Web Application Security, Vulnerability Assessment, Network Security

AI & ML: Artificial Intelligence, Machine Learning, Deep Learning

EDUCATION

Shri Shankaracharya Technical Campus Bhilai (C.G)

B.Tech - Computer Science (IoT & CyberSecurity)

Oct 2022 - May 2026 | CGPA: 7.5

CERTIFICATION & TRAINING

Python and Django Full Stack Web Development

– Udemy

Complete Bug Bounty Program

– Udemy

OTHER SKILLS

OOP, DSA, Database Design, Debugging, Problem Solving, Technical Documentation, Version Control, Project Management, Leadership, Communication
